EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Victor Johnson on 11 May 2004.

The application has been amended as follows:

-On page 1 of the specification, prior to "BACKGROUND...", insert, --This application claims the benefit of provisional application of 60/342,137, filed on December 18, 2001.--

-Cancel claims 16-20,

-In claim 24, line 4, before "portion" insert --surface--, and,

-In claim 33, line 6, before "portion" insert --surface--.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the closest prior art is "Optimization of the Design of a Thin-Layer Cell..." by Righezza et al (cited in most recent IDS). "Optimization" teaches a flow-through electrochemical cell assembly, however, the working electrode is embedded inside the electrically insulating substrate, not disposed on a surface portion thereof (claims 24 and 33) or as a layer on the electrically insulating substrate surface (claim 1). There is no motivation to adapt the embedded electrode of "Optimization" to be a surface electrode as is presently claimed.

For the same reason the present claims are allowable over Applicant's admitted prior art ED40 device. In addition, Finn is the second closest prior art. However, Finn does not teach that the reference and counter electrodes are in fluid communication with the sample flow channel. The sample flow channel, 18, of Finn does not communicate with the reference of counter electrode. Therefore, claims 24 and 33 are allowable over Finn. Claim 1 is allowable over Finn because Finn does not teach that at least a portion of the substrate surface is exposed to the sample flow channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
